```typescript
import { NextResponse } from "next/server";

export async function POST(req: Request) {
  const body = await req.json();
  const { run_id, tenCat, gss } = body;

  // simple mock label logic
  const label = tenCat.severity >= 6 || gss.globalRisk >= 6.5 ? "RISK" : tenCat.severity >= 4 ?
"WATCH" : "OK";

  return NextResponse.json({
    run_id,
    completedAt: new Date().toISOString(),
    tenCat,
    gss,
    label,
    stageIIUnlocked: true
  });
}
```
